

Concept: Cabinet Art Panels

Unlike manufactured modular cabinets that offer standardized units. Our concept is to design and build “art furniture” with thematic motifs inspired by customer personalization. We combine over forty years of traditional woodworking skills with original art.

The design process begins with your orientation of design. For example: A Country Pine kitchen with a whimsical motif from nature. The door panels could represent seasonal change and be changeable during the year. You may have a penchant for Art Nouveau, perhaps French Country; you can combine these with art depicting your favorite memory or integrate the celebration of social and religious holidays. In today’s market; design potential is only limited by resource and availability.
